

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Ignatious et al.

Serial No.: 10/596,566

Group Art Unit No.: 1642

Filed: June 16, 2006

Examiner: B. J. Fetterolf

For: POLYMERIC MICELLAR COMPLEXES AND DRUG DELIVERY  
VEHICLES THEREOF

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

RESPONSE TO RESTRICTION REQUIREMENT

This paper is in response to the Restriction Requirement mailed June 24, 2008, having a shortened statutory period for reply of 1 month. Claims 1-16 are pending in the application. Claims 1-16 are subject to a restriction requirement and/or election requirement.

According to the Examiner, restriction is required under 35 U.S.C. 121 and 372:

- Group I. Claims 1-12, as specifically drawn to the special technical feature of a complex of an amphiphilic copolymer with a bioactive agent, wherein the amphiphilic copolymer has benzoyl sulfonic acid groups on the hydrophobic segment of said copolymer and a method of treating a cancer comprising administering an effective amount of the complex to a patient in need thereof.
- Group II. Claim 13, as specifically drawn to the special technical feature of a method of treating osteoarthritis, rheumatoid arthritis, diabetic retinopathy, hemangiomas or psoriasis comprising administering an effective amount of a complex of an amphiphilic copolymer with a bioactive agent, wherein the amphiphilic copolymer has benzoyl

sulfonic acid groups on the hydrophobic segment of said copolymer.

- Group III. Claim 14, as specifically drawn to the special technical feature of a complex of an amphiphilic copolymer with a contrast agent, wherein the amphiphilic copolymer has benzoyl sulfonic acid groups on the hydrophobic segment of said copolymer.
- Group IV. Claim 15, as specifically drawn to the special technical feature of a method of diagnostic imaging comprising administering an effective amount of a complex of an amphiphilic copolymer with a contrast agent, wherein the amphiphilic copolymer has benzoyl sulfonic acid groups on the hydrophobic segment of said copolymer.
- Group V. Claim 16, as specifically drawn to the special technical feature of a process of making and amphiphilic copolymer having benzoyl sulfonic acid groups by reacting the amphiphilic copolymer with sulfobenzoic anhydride either in the melt or in solution.
